

SIDDAMSETTY SATHISH KUMAR

Hyderabad, India | +91-7093632531 | Kumar.Siddamsetty01@gmail.com

PROFESSIONAL SUMMARY

AWS DevOps Engineer with **4+ years of experience** designing, automating, and managing scalable cloud infrastructure and CI/CD platforms across AWS environments. Expertise in **Infrastructure as Code (Terraform)**, **Kubernetes orchestration (EKS)**, **Docker containerization**, **CI/CD automation (Jenkins & GitHub Actions)**, and cloud monitoring solutions. Proven track record in **DevSecOps**, **GitOps workflows**, **production deployments**, and high-availability systems in enterprise environments.

CORE SKILLS

Cloud Platforms: AWS (EC2, S3, IAM, VPC, Route53, RDS, EKS, CloudWatch, Lambda)

CI/CD Tools: Jenkins, GitHub Actions, GitLab CI/CD

Containerization & Orchestration: Docker, Kubernetes, Helm, ArgoCD

Infrastructure as Code: Terraform, Ansible, CloudFormation

Monitoring & Logging: Prometheus, Grafana, CloudWatch, ELK Stack

Scripting & Automation: Shell Scripting, Python, Bash

Version Control: Git, GitHub, Bitbucket

DevSecOps: IAM Policies, Security Groups, Vulnerability Scanning, Secrets Management

Agile & ITSM: Jira, Confluence, ServiceNow

PROFESSIONAL EXPERIENCE

DevOps Engineer | Zinnia

Dec 2024 – Present

- Designed and implemented scalable CI/CD pipelines using Jenkins and GitHub Actions for automated build, test, and deployment workflows across multiple environments.
- Automated AWS infrastructure provisioning using Terraform modules, reducing manual configuration efforts by 70% and improving deployment consistency.
- Managed Kubernetes (EKS) workloads including deployments, scaling, ingress configuration, and rolling updates for microservices-based applications.
- Containerized applications using Docker and deployed them into Kubernetes clusters using Helm charts.
- Integrated monitoring and alerting using Prometheus, Grafana, and CloudWatch to improve observability and reduce incident response time.
- Implemented IAM roles, policies, and least-privilege access controls to strengthen cloud security posture.
- Developed Python and Shell scripts for infrastructure automation, log cleanup, backup automation, and operational tasks.
- Implemented GitOps workflows using ArgoCD for continuous delivery and configuration management.
- Migrated legacy workloads to AWS cloud, reducing infrastructure cost by 25%.
- Collaborated with development and QA teams to streamline release management and improve deployment reliability.
- Supported production environments by troubleshooting deployment failures, pod issues, and infrastructure-related incidents.

DevOps Engineer | Accenture

Apr 2021 – Feb 2024

- Built and maintained end-to-end CI/CD pipelines using Jenkins and GitLab CI/CD for automated application deployments.
- Provisioned and managed AWS cloud infrastructure using Terraform following Infrastructure as Code (IaC) best practices.
- Administered Kubernetes clusters (EKS/AKS/GKE) and managed microservices deployments with high availability and auto-scaling configurations.
- Implemented GitOps deployment strategies using ArgoCD for continuous delivery and configuration management.

- Configured centralized monitoring, dashboards, and alerting using Prometheus, Grafana, and CloudWatch.
- Migrated on-premise applications to AWS cloud infrastructure, resulting in 25% reduction in operational costs.
- Automated repetitive operational tasks using Shell scripting and Python to improve engineering productivity.
- Managed Docker image creation, optimization, and deployment through container registries.
- Worked on incident management, root cause analysis (RCA), and production support activities in agile environments.
- Collaborated with cross-functional teams to improve deployment strategies, security compliance, and infrastructure reliability.

KEY PROJECTS

AWS IAM Key Rotation Automation

- Developed automated IAM access key rotation solution using AWS Lambda, Python (Boto3), and CloudWatch Events.
- Improved security compliance by 80% and eliminated manual key rotation activities across AWS accounts.
- Configured automated notifications and monitoring for key expiration tracking.

Matillion Framework Automation

- Automated infrastructure provisioning and deployment workflows using Terraform and Jenkins pipelines.
- Standardized AWS environment creation process and reduced deployment failures by 20%.
- Integrated CI/CD automation for faster release cycles and environment consistency.

EDUCATION

Bachelor of Science – Computer Science | CGPA: 8.5/10

JNTU Anantapur College of Engineering University | 2021

CERTIFICATIONS

- Amazon Web Services Certified Cloud Practitioner / Solutions Architect
- Microsoft Azure Fundamentals (AZ-900)
- ITIL Foundation

ACHIEVEMENTS

- Cheers Award – Accenture (2022, 2023)
